Library Audit

Objective: To improve the academic resource management and access in the college Library.

As a repository of information and academic material, the library is a significant cog in any institutional machinery. With e-learning becoming more of a primary facet of modern education and the traditional library being supplemented with digital libraries, a need was felt to further improve and equip our library to provide all the available resources to the students. With this in mind, a workshop on Open Access e-Resources for Digital Learning was organised on the 15th of December, 2021.

The workshop focussed on accessible e-resources such as Green Open Access, Goal based Open Access and Diamond Open Access which are in the public domain and accessible to all students. This workshop was attended by 333 participants.
